

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

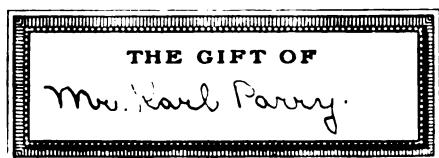

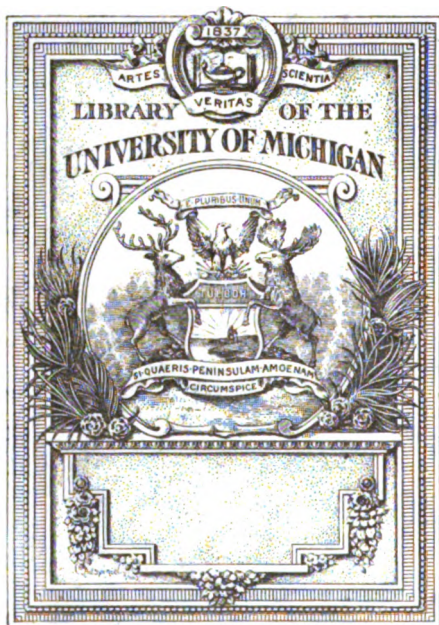

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. Sixteenth Annual Report

OF THE

Factory Inspector

OF

ILLINOIS

YEAR ENDING DECEMBER 15, 1908.

**SPRINGFIELD, ILL.
ILLINOIS STATE JOURNAL CO., STATE PRINTERS
1911**

PART I.

LETTER OF TRANSMITTAL.

OFFICE OF ILLINOIS DEPARTMENT OF FACTORY INSPECTION,
SECURITY BUILDING,

CHICAGO, ILL., Dec. 15, 1908.

To His Excellency, Hon. Charles S. Deneen, Governor of Illinois:

DEAR SIR—I have the honor to submit herewith the sixteenth annual report of the Department of Factory and Workshop Inspection, for the year ending Dec. 15, 1908.

Very respectfully yours,

EDGAR T. DAVIES,

Chief Inspector of Factories and Workshops.

REPORT OF STATE FACTORY INSPECTOR.

To His Excellency, Charles S. Deneen, Governor, State of Illinois:

GOVERNOR—Complying with section two (2) of the statute creating the Department of Factory and Workshop Inspection, I have the honor to lay before you the sixteenth annual report of the department for the year ending Dec. 15, 1908.

During this year great progress has been made in the accomplishment of reforms that are of paramount importance to employers and industrial workers alike. Not only has this department been obliged to exercise that constant care and vigilance which is necessary to the proper enforcement of all the laws which come under our jurisdiction, but we have also endeavored to assist and instruct the employers, employes and the general public in the new duties imposed upon them by acts passed by the last General Assembly. We have also rendered all the assistance that we were capable of giving to the Industrial Commission and to the Commission on Occupational Diseases, both of which were created by the Forty-fifth General Assembly.

As the result of our own exhaustive researches into the serious problems which these commissions have been called upon to investigate, and our inquiries both at home and abroad, we believe that they will be able to recommend measures to the next session of the Legislature that, if enacted, will greatly ameliorate evil conditions which have been found to exist.

Our work, both as to the administration of the existing laws and aiding the two commissions above named, has been crowned with success, as will be apparent, I think, from a careful perusal of the following pages, and I desire to express my appreciation of the good work done by the men and women of this department, and to thank them for their hearty coöperation and conscientious and willing work, which has made possible our achievements.

It is the province and purpose of this department, acting in accordance with the laws creating it, and to those laws which we are called upon to administer, to safeguard the interests of all the people of Illinois and especially of that class of our citizens who are engaged in industrial pursuits, whether as owner, employer, employé or laborer. In many instances the interests of the two classes are identical, although perhaps each looks upon the question from a different point of view, which makes the other's attitude appear hostile. Therefore, it not infrequently happens, that this department, intervening as a third and unbiased party, whose sole purpose is to procure such concessions from both as will be

of benefit both to employer and employé, without in the least harming any one, can bring erstwhile antagonists to a common understanding of questions which have been in dispute, and thereby reëstablish harmonious relations.

It has always been our policy to enforce the laws with consideration for all. Occasionally, however, we encounter contumacious persons, seeking to impose their own personal greed, and their biased ideas regarding the welfare of their employés, above the laws of the State, and against whose obduracy no amount of amiable argument or gentle persuasion will avail, and it is against such persons as these that we are obliged to proceed to the fullest extent of our authority under the law. In the majority of cases, however, we have accomplished our ends and instituted reforms, more often by persuasion than by force.

BUILDING INSPECTION.

It is a matter of peculiar interest this year to note the results obtained by the operation of the building inspection law, which was passed by the Forty-fifth General Assembly. This law became effective July 1, 1907, and this department immediately took up the work under it, but at the time of writing our last report, it had only had six month's trial. We are now able to record the results of a full year of operation, and to compare this year with the twelve months immediately preceding the passage of the Act. The results have been eminently satisfactory.

It was my purpose in framing the building inspection law to enforce conditions of safety for those engaged in the hazardous work of erecting buildings, bridges and other aerial structures. The rapid strides which have been made in the past few years in the development of the so-called skyscraper, had not previously been kept pace with by the law-makers.

Caissons, sunk to a depth of 100 feet or more through the various earth stratas underlying the city, finally rest upon the solid substratum of shale rock, and support huge masses of steel, stone, brick or tile, rising to great heights. Small armies of men spend their days crawling about on these huge steel skeletons, each day finding them farther and farther away from the surface of the earth. Their situations are hazardous enough of themselves, without being made more so by the fact that they are compelled to exert their full strength while standing upon a footing so insecure that the slightest misstep or overbalance would send them whirling through space.

It is a melancholy fact that there is scarcely a skyscraper in Chicago which has not taken the toll of several human lives while in process of erection. But it was for the purpose of safeguarding as much as possible this extra hazardous occupation that the present law was enacted, giving to the Department of Factory Inspection the right to inspect these structures and to compel the owners and contractors to use precautions necessary for the security of the laborers.

The art of building skyscrapers had developed too fast for protective laws to keep pace with, and it became necessary to enforce some sort of precautionary measures upon builders and contractors to minimize the hazard of the employés. Certain regulations for the safety

of men engaged in the erection of buildings, bridges, smokestacks, elevated tracks, coal conveyors and other constructive work of a like character were embodied in an Act of the Legislature, and upon this department was fixed the burden of administration. This law went into effect July 1, 1907. Among the things which are chiefly required under it are:

(a) The reinforcement of all scaffolding, and safe construction and maintenance of hoists and cranes.

(b) Placing planks across the steel beams and girders to make safe walks for men.

(c) Posting placards at dangerous points, and others, showing the sustaining power of various parts of the building during construction.

(d) Barricading, or otherwise guarding all openings.

(e) Permanent floors, properly supported and not overloaded, must be constructed to within two stories of the point where structural steel erection is going on.

Of course, as the law was effective during the last six months of 1907, it would be manifestly unfair to compare the statistics of 1908 with those of the previous year, and we have therefore chosen the statistics of 1906 for the comparison as in that year there was no building inspection law that this department had anything to do with. It might be well, however, to remark in passing, that in the first six months of the operation of this law—that is, from July 1 to December 30, 1907—the number of men injured in the building trades was twenty-eight as compared with ninety injuries during the corresponding period of 1906. Also the loss of time to the laborers was much less under the new law, there being a loss of 214 weeks during the last six months of 1907, as compared with 589 weeks in the corresponding period of the previous year.

Our inspectors were busy in 1908. All told, we have made 145 inspections, of which ninety-three were made in the city of Chicago, and the other fifty-two were made in other cities throughout the State where that class of buildings are erected that come within the scope of the law. And of these 145 inspections, 123 were made on buildings, eight were on track elevations, twelve on bridges, one was a smokestack and one a coal carrier. Of the buildings inspected, seventy-one were located in Chicago.

By January, 1908, contractors had become pretty much accustomed to the new law, recognizing its value, which had been plainly shown by the rapidly diminishing number of fatalities, and they were inclined to live up to its provisions. Consequently we found very few violations of the law, only thirty-six, in fact, out of the whole 145 inspections, and in a majority of cases they were simply minor oversights which they remedied as soon as attention was called to them.

Twenty-six of the places where we found violations of the law were located in Chicago, and they may be classified as follows:

Eighteen failures to post placards.

Four failures to barricade openings.

Two failures to properly reinforce scaffolds.

Two failures to plank over steel beams.

The ten violations out of fifty-two inspections in other cities were of the same general character:

Four failures to plank over steel beams.

One failure to post placards.

Two failures to barricade openings.

Three failures to put in permanent floors.

It is plain to see, therefore, that the percentage of violations to the number of inspections is only about 25 per cent, and if we deduct the failures to post placards, which frequently is due to carelessness on the part of workmen themselves, the percentage of violations is lowered to about 11.5 per cent.

We have already stated that in order to show the decrease in fatalities and the corresponding decrease in time lost, under the operation of the law in 1908, we must make comparisons with the 1906 statistics. Our records for these two years show, that in 1908 there were fifty-eight persons injured in the building trades, as against 145 in 1906. It is also shown that the loss of time to laborers through injuries received on buildings in 1908 was only 310 weeks, as compared with 904 weeks in 1906. It will be seen, therefore, that the building inspection law and our vigilance is responsible for a 60 per cent decrease in fatalities, and 65.71 per cent decrease in loss of time to men engaged in the building trades.

BUTTERINE AND ICE CREAM INSPECTION.

Another act which was placed on the statute books of Illinois by the Forty-fifth General Assembly, and which falls under the jurisdiction of this department, is that relating to the manufacture of butterine and ice cream.

The aim of this law is to compel manufacturers of butterine and ice cream to maintain such healthful and sanitary conditions on their premises as to preclude the possibility of pollution or contamination of their product during the process of manufacture. Under this law, only such places as are conducted in compliance with its strict provisions may receive a certificate from the factory inspectors, and if future inspections reveal any laxity on the part of the manufacturer he promptly loses his certificate.

It is hardly believable that such awful conditions could exist as we found in some of the ice cream "plants." Seldom did we find anything to criticize in the plants of the larger manufacturers, for as a rule these men use every precaution to insure the cleanliness of their product. But, unfortunately, much of the ice cream that is sold, especially in the poorer districts, is manufactured by men of foreign birth, who are absolutely ignorant of the laws of sanitation. Among this class of manufacturers we found many cases where ice cream was being made in damp, filthy basements, where ventilation was impossible and the air permeated with the stench of putrifying matter. This ice cream, manufactured in such foul places, could not be otherwise than laden with deleterious germs.

It has been the purpose of this department to force these manufacturers to clean up their plants, and to properly ventilate and install

the proper kind of sanitation. In fact we have tried to do everything in our power to insure the purity and wholesomeness of the product, free from any sort of contamination that might come from the pollution of the surrounding air, or from dirty floors and walls. In this endeavor we have had considerable success, and while the people with whom we have had to deal have, in many instances, been densely ignorant and quite incapable of comprehending the necessity for, or the virtue of, the changes we have required, they have a wholesome regard for the law, especially when it is backed up by an official star and a certificate with a big red seal attached.

We quote herewith the law itself as the best means of indicating what powers have been vested in us to clean up the insanitary places:

"State of Illinois.

"AN ACT relating to the manufacture of butterine and ice cream.

"SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* That all buildings or rooms occupied by butterine or ice cream manufacturers shall be drained and plumbed in a manner conducive to the proper and healthful sanitary condition thereof, and shall be constructed with air shafts, windows and ventilating pipes sufficient to insure ventilation. The factory inspector shall direct the proper drainage, plumbing and ventilation of such rooms or buildings. No cellar or basement now used for the manufacture of butterine or ice cream shall be so occupied or used unless the proprietor shall comply with the sanitary provisions of this Act.

"Sec. 2. Every room used for the manufacture of butterine and ice cream shall be at least eight feet in height, and shall have, if deemed necessary by the factory inspector, an impermeable floor constructed of cement, or tiles laid in cement, or an additional flooring of wood properly saturated with linseed oil. The side walls of such room shall be properly plastered and wainscoted. The factory inspector may require the side walls and ceiling to be whitewashed at least once in three months. He may also require the woodwork of such walls to be painted. The furniture and utensils shall be so arranged as to be readily cleansed, and not prevent the proper cleaning of any part of the room. The manufactured butterine and ice cream shall be kept in dry and airy rooms, so arranged that the floors, shelves and other facilities for storing the same can be properly cleaned. No domestic animal shall be allowed to remain in the room where butterine and ice cream are manufactured or stored, and no water closets and ash pits shall be within or connected with the rooms used in the manufacture of butterine or ice cream.

"Sec. 3. The State Factory Inspector shall cause such manufactories to be inspected. If it be found upon such inspection that the manufactories so inspected are constructed and conducted in compliance with the provisions of this Act, the factory inspector shall issue a certificate to the persons owning or conducting such manufactories.

"Sec. 4. If, in the opinion of the State Factory Inspector, alterations are required in or upon the premises occupied and used as butterine and ice cream manufactories in order to comply with the provisions of this Act, a written notice shall be served by him upon the owner, agent or

lessee of such premises, either personally or by mail, requiring such alterations to be made within sixty days after such service, and such alterations shall be made accordingly.

"Sec. 5. Any person who violates any of the provisions of this Act, or refuses to comply with any of the requirements as provided herein of the factory inspector or his deputies, who are hereby charged with the enforcement of this Act, shall be guilty of a misdemeanor, and on conviction shall be punished by a fine of not less than fifty dollars (\$50.00) nor more than two hundred dollars (\$200.00), nor more than five hundred dollars (\$500.00) for the second offense, or imprisonment for not more than thirty (30) days, and for a third offense by a fine not less than five hundred dollars (\$500.00) nor more than sixty (60) days imprisonment, or both.

"Approved June 3, 1907. In force July 1, 1907."

This department has made 608 inspections under this Act during 1908, of which 282 were in the city of Chicago, and 326 in other Illinois cities and towns. Out of all the places inspected we were only able to grant 391 certificates, of which number 234 were granted to proprietors of manufactories in Chicago, and the balance, 157, were issued to the owners in other cities and towns in the State.

It is interesting to note that the percentage of insanitary butterine and ice cream factories is much higher in the other cities and towns in the State than in Chicago, which undoubtedly is due to the fact that the department of health in the latter city is more stringent in the enforcement of local ordinances than are the authorities in other cities. For instance, out of the 282 places inspected in the city of Chicago, we found only forty-eight, or about 17 per cent which violated the provisions of the Act, while out of the 326 places inspected in all other cities and towns in the State, seventy-eight, or about 24 per cent were found to be insanitary.

In Chicago there was only one instance where a proprietor to whom a certificate had been once issued by this department failed to live up to the provisions of this Act, so that we were obliged to revoke the certificate. But outside of Chicago there was not a single case where we had to revoke a certificate.

Our 282 inspections in Chicago included 250 confectionery and fruit stores, twenty-nine ice cream manufactories and one butterine factory, and the balance of the places were hotels, drug stores, groceries, bakeries and caterers. Outside Chicago our inspectors visited 130 cities and towns, and among the 326 places inspected were 200 confectionery stores, eighty-six ice cream manufactories, fourteen bakeries and restaurants, and the balance were dairies, drug stores and groceries.

Total.....	608

During the year the department has been called upon to prosecute in the courts only twelve cases where there have been flagrant and persistent violators of the law. We have been successful in the prosecution of every one of these cases. A large number of cases were taken to court and defendants were not fined, because in the interim they had met the law's requirements and we therefore did not demand penalty.

METAL POLISHERS' INSPECTIONS.

In years gone by the health and even the lives of thousands of men and women have been sacrificed or endangered by the poisonous dust that arose from the metal polishing and grinding wheels. Before the law compelling the use of blowers on metal polishing machinery went into effect, the usual practice in factories—large and small—was to permit the dangerous particles and metal and emery dust to fly off into the air, to be drawn into the lungs of all who labored in the same room with the polishing and grinding machinery.

Since the writer took office, in 1901, this department has been ever vigilant in enforcing this law, and with most beneficent results. It is seldom now that our inspectors find a shop where metal polishing is done on an extensive scale, that there is not strict compliance with the letter and spirit of the law, and it is still more seldom that a proprietor does not, without delay, make any changes which this department may suggest.

During the year 1908 our inspectors have made 348 visits in 164 shops or factories throughout the State where metal polishing is carried on to a greater or less degree. In these 164 shops and factories were 1,315 men and women operating metal polishing machinery, to say nothing of the thousands of others laboring in the same room, breathing the same air, whose lives would have been put in peril by the injurious dust, if proper appliances for carrying it away had not been installed. Out of the total of 164 places, however, only fifteen were lacking in the required equipment, and in nearly every instance a simple notification on our part was sufficient to cause the owners to supply blowers.

There were only three instances in which we found it necessary to bring suit against the proprietor, and in each of these cases convictions were secured and fines assessed. One recalcitrant proprietor pursued dilatory tactics and it took us nine months to get him to properly equip his machines, but in all other instances where notice was served the work was done within two or three months.

Out of the 164 places inspected, fifty-three were located in the city of Chicago, and 111 were in other cities or towns in Illinois. In the fifty-three Chicago shops we found that nineteen were exempt under the law from the requirements regarding blowers, on account of having only one machine, and we also found 202 exemptions outside of Chicago. The 1,315 men and women employed in operating metal polishing machines were divided as follows, 745 being in Chicago and the balance, 570, being in other cities and towns in the State.

Outside of Chicago we discovered only three shops that were not equipped, and these three immediately set to work to install the proper equipment as soon as notice was served on them, and they completed the work in an average time of one month. We did not find it necessary to bring a single suit against owners of metal polishing shops outside of Chicago.

In Chicago and the State at large, our inspectors found a large number of cases where it was necessary to serve notice upon the proprietor to remodel his plant, owing to a deficiency in the blower systems. In most cases the owners complied at once with the instructions issued by this department, and the average time required to make the necessary installation was three months. In three instances, however, we found it necessary to bring suit against the owner before our orders could be enforced, and in each case we carried the suit to a successful issue and fines were assessed and collected.

CHILD LABOR LAW.

Constant vigilance is the price we have to pay for stamping out the curse of child labor. More actual work and time on the part of the inspectors of this department are required to enforce the child labor law, than is necessary in the administration of all the other Acts that come under our jurisdiction. Approximately 75,000 inspections, both day and night, have been made during the past year for this purpose alone.

Moreover, we find that more stringent methods are necessary in dealing with the child labor problem than in the execution of any of the other laws which this department has to enforce, and by far the largest number of prosecutions which have been instituted by me in the courts have been under this Act. But our vigilance and efforts have been crowned with success, thanks to the excellence of the new statute regulating child labor, so that in the past five years child labor in this State has been reduced about 35 per cent.

The majority of the violations of the Child Labor Law occur in the small cities and towns, and not in Chicago. There are several ways of accounting for this fact and for the somewhat general tendency on the part of the employers and parents to ignore the statute. The office of the department is located in Chicago and we make more frequent inspections there than in the other cities, and the majority of child labor law violations may be accounted for through the carelessness on the part of the employers and cupidity on the part of the parents. It is not very often that we find an employer willfully ignoring the law and hiring children below the age at which the statute says they may begin to labor, but they are frequently careless about requiring the children to exhibit their age and school certificates, or fail to place the same on file, and too frequently they do not inquire the age of those whom they hire. Rapacious parents on the other hand, anxious to cke out the family income, or to be relieved of the burden of supporting their children, often willfully mis-state their children's ages, and even go to the

extent of making a false affidavit before a notary to the effect that the child is 16 years of age or more. They require the children to perjure themselves, and will go almost any length to get them employed before they have reached the legal age.

While it has always been our policy to deal as leniently as possible with those who unintentionally or inadvertently infringe the laws for the first time, and our method has been to warn, rather than to prosecute, for first offenses, we have, nevertheless, been compelled to bring many suits against violators of the Child Labor Act, because of the previous record of the individual, firm or corporation violating, or the circumstances in connection with the particular violation. The record of these prosecutions speaks for itself concerning the amount of work we have done.

PROSECUTIONS UNDER CHILD LABOR ACT.

	Chicago.	Other Cities.
Employing children under 16 between 7 p. m. and 7 a. m.	11	14
Employing children under 16 in dangerous occupations.	1	7
Employing children under 14.	17	32
Employing children between 14 and 16 more than 8 hours a day.	62	96
Employing children between 14 and 16 without an age and school certificate ..	50	136
	141	285
		141
Total prosecutions.		426

The present Child Labor Law has been in effect since July 1, 1903—over five years, and during that time this department has been extremely active in its enforcement. Moreover, we have endeavored by every means in our power to give the widest publicity to those things which are required of employer and parents, believing that this will be the most effectual way to bring about reform. We have seen to it that the children in the schools were instructed that it is unlawful for them to seek employment before they are 14 years old, and that between 14 and 16 years of age they can only be employed subject to certain legal restrictions.

We have pointed out to them that while they are free to seek whatever employment they wish after they have reached the age of 16, it is perjury and a crime for either their parents or they themselves to make a false affidavit regarding their ages, and that a penalty attaches if this is done. Copies of the law have been sent broadcast to employers, and our inspectors have been diligent in spreading the knowledge among employers, regarding the requirements of the law and its prohibitions.

The result of our efforts has been that the child labor situation in this State is very much improved over what it was when the law was first passed, and the number of children now employed is less by 5,447 than it was five years ago, while the school attendance is correspondingly larger. But so long as cupidity and avarice remain as one of the predominant human characteristics, just so long will we find parents seeking to force their offsprings to become self supporting at the earliest possible

age, and so long will we find employers lax about requiring proof of age or age and school certificates, lax in regard to the proper restriction of hours, such as eight hours a day or the prohibition of night work for children, and with a too frequent disregard for the character of work at which the children are permitted to work, or the failure to require proper proof of age, and last, but not least, too many avaricious men and women who are solely interested in the profit which they can make by conducting their plants through the employment of immature labor; and more and more does our work in the enforcement of the Child Labor Law bring to our attention cases where children have quit school at an early age and have gone to work simply because the school curriculum is ineffective and unattractive and the teachers unfit.

We often hear the complaint that the law is unjust and that it prevents children from entering upon occupations which are harmless to them, edifying or beneficial to many others, and which do not interfere with the health of the child or his chance of obtaining a proper education. Occasionally such instances do come before us, when, owing to the inflexibility of the law which deprives us of all discretion in the matter and from which we never deviate, we are compelled to insist upon the removal of children under 16 years of age from certain occupations which seem to us to be harmless enough, and we believe, therefore, that a certain amount of latitude and discretionary power in this respect, properly circumscribed by legal provisions, should be allowed the State Factory Inspector, in order that the ends of justice might be better served, without minimizing in any way the benefits which have been obtained from the operation of the law.

On the other hand, we believe, that if certain other restrictions were placed in the law, it would greatly add to the efficacy of the measure; for instance, as the law now stands it permits the employment of children who may merely be able to read and write legibly simple sentences in any language, and I believe that it should be amended so that children under the age of 16, who are unable to read and write *English* and pass an otherwise *simple educational test*, should not be permitted to work. And there should be provision for medical supervision, and the department should be equipped to aid in the scientific promotion of vocational training for children.

The law should also provide that children between the ages of 14 and 16 should either be at school or at work. The restrictive provisions of the law should also be increased, so that it would prohibit the employment of any child under the age of 18 in a theater, concert hall or other place of amusement where intoxicating liquors are sold, and I believe that there should be a further prohibition against the employment of females under the age of 18 as chorus girls in any class of theatrical performance, particularly where they are required to appear in tights or abbreviated costumes. Girls under the age of 18 should be prohibited from employment after 8:00 o'clock p. m.

Before concluding this report, we think it no more than proper that we should make some mention of the investigations carried on by the Industrial Commission and the Commission on Occupational Diseases, which were authorized by the Forty-fifth General Assembly. It has been my pleasure to assist in the work of both of these commissions—in the case of the former as an advisor and in the latter instance as a member of the commission.

As will be noted by the previous annual reports of this department, which the writer had the honor to compile, I have continuously urged upon the Legislature the necessity for the passage of modern laws, embracing practical scientific provisions for reducing industrial hazards and the minimizing of industrial accidents and fatalities, and the promotion of the health, safety and comfort of the working classes; the conservation of children, the protection of women and the restriction of the hours of their employment, and the need of eliminating the dangers of disease directly traceable to many occupations in which the wage earners of our State are engaged. While it required a number of years of careful study and hard work, it was a pleasure to draft a number of bills, which have been considered by the Legislature (and some have been enacted into law). However, I am not satisfied, nor shall I be satisfied, until this great State enacts into law, and creates the

machinery for enforcement, the necessary statutes which we must secure if we are to conserve the human resources of this commonwealth, and discharge the State's obligation to society. The need of enacting into law the principles embodied in the legislation submitted is plainly manifest to any intent student of our economic or industrial problems.

In the drafting of, and the work which I put forth to secure the passage of, the two resolutions which resulted in the creation of the Industrial Commission and the Occupational Disease Commission, it was necessary for me to spend considerable time in attendance upon the sessions of the General Assembly. As certain drafts of bills which were submitted by the department failed of enactment, and realizing the regrettable lack of knowledge on the part of the lawmakers of the existing conditions in this State, I concluded that, if the several commissions were provided for, the members of the next General Assembly could very properly have brought to their attention facts which would be most convincing in showing the need for improved and adequate legislation to cope with existing conditions.

The personnel of the two commissions which have been appointed by you, with the exception of the writer, of course, is most direct and positive evidence that the subjects which they are to handle will have most thorough and proper consideration. And it is an honor and a compliment to the State that you have selected men of such prominence and recognized ability, and the people of the State should be deeply grateful to the respective members of the commissions for the services rendered, for it is not always that we can find men of such reputation and ability to give of their time so freely without reward or compensation.

PERSONNEL OF THE INDUSTRIAL COMMISSION.

Edwin R. Wright, President State Federation of Labor.
 Samuel A. Harper, Attorney-at-Law.
 David Ross, Secretary Bureau of Labor Statistics.
 Charles Piez, President Link Belt Company.
 E. E. Baker, Kewanee Boiler Works.
 P. A. Peterson, Capitalist and Manufacturer, Rockford.
 Henry B. Favill, Physician.
 Graham Taylor, Chicago Commons.
 Peter W. Collins, Secretary Int. Bro. of Electrical Workers.
 William Rossell, Machinist, Member Chicago Federation of Labor.

PERSONNEL OF COMMISSION ON OCCUPATIONAL DISEASES.

Geo. W. Webster, M. D., President Illinois State Board of Health.
 Charles R. Henderson, University of Chicago.
 Edgar T. Davies, Chief Department of Factory Inspection.
 Ludwig Hektoen, M. D., Memorial Institute for Infectious Diseases.
 Arnold P. Klebs, M. D., Director, Chicago Tuberculosis Institute.
 James Simpson, Vice President, Marshall Field & Co.
 James A. Egan, M. D., Secretary Illinois State Board of Health.
 David Ross, Secretary Bureau of Labor Statistics.
 Alice Hamilton, Memorial Institute for Infectious Diseases.

The study of the cause and effect of various industries upon the health of those employed in them presents a vastly complex problem. In Europe many learned men have devoted their lives to similar investigations in workshops and laboratories. There is a vast literature upon the subject which needs to be studied, but it is locked in so many languages that it must first of all be translated before being of any use to us. While it is a scientifically demonstrable fact that many occupations beget, in those who follow them, various forms of diseases, it is also well known that much of the sickness and mortality so caused is not fated or necessary.

Much of the evil can be prevented, or at least mitigated, by methods already known to science and embodied in the best regulations and laws. Some manufacturers in this State have already discovered and applied these methods to the evident advantage of themselves and their employes, but the Illinois Legislature in past years has maintained an indifference towards matters of this sort, in consequence of which our statute books are barren of any laws regulating the hygienic treatment of employes, and there is no legal criterion upon which the owners and proprietors of manufacturing establishments may pattern.

During the past year the writer has pursued his studies upon this subject, and the investigation of factories and work places for material relative to the prevention of industrial fatalities and accidents, and the promotion of sanitation and hygiene, through England, France, Germany and other countries of Europe, where great advance has been made in the classification of occupational diseases, and there remedial legislation has been tried with beneficent results. I have collected much valuable data which will be compiled and eventually published, in part, by the commission in its report, and elaborated on in departmental publications.

I believe that the investigations and researches of the Occupational Disease Commission will result in the publication of a most complete collection of facts, data, deductions and statistics, regarding occupational diseases and the means of mitigating or preventing them. The benefits accruing from such a compilation alone will be of inestimable value, and if the remedial legislation which this commission will be able to recommend shall be adopted, Illinois will lead the states of this country in the matter of watching over and caring for the lives, health and happiness of its artisans.

And in our study and work in this direction too much credit cannot be given to the painstaking and earnest efforts of Dr. Charles R. Henderson of the University of Chicago, who has made a special study of these problems over a period of years, both in this country and abroad, and has gathered much material at his own expense and gave to the writer many suggestions and much encouragement which resulted in the drafting of, and the introduction of, the resolution creating the Occupational Disease Commission.

What I have said concerning the value of the work performed, and to be performed, by the Commission on Occupational Diseases, applies in a no less degree to the Industrial Commission, which has not yet

completed its labors, but will soon be ready to recommend measures which, if adopted, will guard the hazardous and dangerous machinery and places of employment, and provide for employers to maintain proper and sufficient sanitary and ventilating systems in their establishments.

A number of the progressive manufacturers have already taken the precaution to protect the lives and limbs of employ  s from dangerous machinery, but, there being no standard fixed by law, deplorable conditions have been found to exist in many places. While my part in the investigations and the work of the Industrial Commission has been purely advisory, I have taken keen interest in assisting the members, in so far as it has been in my power, and particularly with reference to *drafting the measure* which will be recommended by the commission, in as much as the administration of this Act, should the Legislature see fit to adopt it, will naturally fall upon this department.

And I trust that whether I or some one else shall have the honor to direct the affairs of this rapidly growing department in its work of trying to improve conditions and promote the welfare of the wage earners, all citizens, whether representing capital or labor or other walks of life, will lend their aid and co  peration, and that the Legislature will soon realize the important necessity of providing for the completement of the inspection corps, the furnishing of the necessary supplies and the allowance of the proper appropriation. It is discouraging to find the lawmakers so parsimonious in their appropriations and in their failure to provide a sufficient number of trained and skilled deputy inspectors and clerical help, but each year and each session is an improvement, and is encouragement in the belief that the time is not far distant when the lawmakers will appreciate the many lives that can be saved and the cripples lessened, and the dollars saved to the State, by providing for the necessary expenditures to more adequately promote the health, safety and comfort of its peoples.

Much material which is under preparation for this report unfortunately cannot be included in this volume because of the fact that before its completion it was necessary to lay off a number of the department's employ  s on account of lack of funds. Appreciation is expressed for the slight increase in the appropriation allowed, but it was not nearly sufficient for the work, nor commensurate with the added obligations and expenses of the department. It is not a matter of general knowledge that the duties of the department require voluntary services on the part of the office force and deputy inspectors at night, but it is a very frequent and common occurrence to receive from the working men and women of this State words and expressions of appreciation for the progress made by you and your administration in promoting their welfare and safety.

Hereto appended are the various statistical tables which are worthy of careful study, and to the student and investigator present facts in the way of figures which will, when scanned, aid in a better understanding of the very broad and increasing field the department is covering; and if the department was provided with one or more statisticians the subjects covered in the tables and in the field of investigation

could be handled in such a way as to furnish more valuable information and data than is possible under present conditions, for we have neither the clerical help nor the money, and, strange to say, neither have we time to present the facts and figures in the way the writer believes they should be presented for the best interest of the State and the department and the importance of the subjects dealt with.

I should like to point out numerous interesting facts which the work of the department has brought to light, but must wait for a future date and the necessary money and help, when it will be a pleasure and a duty to present a more scientifically prepared treatise and publication of the work of the department.

Following the statistical tables, and preceding the catalogue of inspections made, may be found the texts of the various laws enforced by the department, other than the Butterine and Ice Cream Law, which has been included in this descriptive review.

STATISTICAL TABLES.

The following table will show the result of inspections for the year 1908:

Total number of inspections in the State of Illinois.....	93,556
Number of places inspected for child labor.....	75,313
Number of places inspected for child labor in Chicago.....	37,910
Number of places inspected for child labor outside of Chicago.....	37,403
Number of places inspected for construction of bridges and buildings in Illinois.....	145
Number of places inspected for manufacture of butterine and ice cream in Illinois.....	608
Number of places inspected for metal polishing wheels.....	164
Number of cities and towns visited outside of Chicago.....	357
Number of second inspections.....	7,326
Employés in Chicago—	
Number of males over 16 years of age.....	354,156
Number of females over 16 years of age.....	118,921
Number of males under 16 years of age.....	4,070
Number of females under 16 years of age.....	4,025
Total number of employés in Chicago.....	481,172
Employés outside of Chicago—	
Number of males over 16 years of age.....	233,302
Number of females over 16 years of age.....	39,263
Number of males under 16 years of age.....	1,486
Number of females under 16 years of age.....	468
Total number of employés outside of Chicago.....	264,519
Employés in the State of Illinois—	
Number of males over 16 years of age.....	577,458
Number of females over 16 years of age.....	158,184
Number of males under 16 years of age.....	5,556
Number of females under 16 years of age.....	4,493
Total number of employés in the State of Illinois.....	745,691

CONDENSED STATISTICAL TABLE OF THE DIFFERENT INDUSTRIES IN CHICAGO.

Industries.	Number of inspections.	Total number of employes.	Number of males over 16 years of age.	Number of females over 16 years of age.	Number of boys between 14 and 16 years of age.	Number of girls between 14 and 16 years of age.	Number of children under 14 years of age.	Total number of children under 16 years old.	Per cent of children to total employes.	Number of children to 1,000 employes.	Total number of employes to one child.

THE NEW ACT CREATING THE DEPARTMENT OF FACTORY INSPECTION, STATE OF ILLINOIS.

This law was drafted, endorsed and brought to successful passage by the writer because of the fact that there was considerable doubt as to the constitutionality of the original Act of 1893 creating the Department of Factory Inspection, because the powers of the department within the past few years have been so broadened that there was great danger that the issue might be raised that an Act of the Legislature would embrace only one subject and that to be expressed in the title, and the Act of 1893 was an Act to regulate the manufacture of garments and wearing apparel, and several of those provisions were formed to create a department of factory inspection. There is no doubt that the law as now drawn creating the present Department of Factory Inspection is in full conformity and compliance with the requirements of the Constitution of the State of Illinois.

AN ACT to provide for the establishment of a department of factory inspection, providing for the appointment of factory inspectors, and an attorney for the department, and prescribing their duties, and to repeal all acts or parts of acts in conflict therewith.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* That there is hereby created and established a separate and distinct department of the State Government to be known as the "Illinois Department of Factory Inspection."

Sec. 2. The Governor shall, upon the taking effect of this Act, appoint a chief State factory inspector, whose duty it shall be to exercise general supervision over the department of factory inspection, and secure the enforcement of all laws now in force or hereafter enacted, relating to the inspection of factories, mercantile establishments, mills and workshops, and commercial institutions in this State, and to perform such other duties as are now or may hereafter be prescribed by law, to be performed by the factory inspector. The salary of such chief State factory inspector shall be three thousand dollars (\$3,000.00) per annum and his term of office shall be four years. The Governor shall also appoint upon the taking effect of this Act, an assistant chief factory inspector at a salary of one thousand five hundred dollars (\$1,500.00) per annum, and twenty-five deputy factory inspectors at a salary of one thousand two hundred dollars (\$1,200.00) per annum, and an attorney for said department at a salary of one thousand five hundred dollars (\$1,500.00) per annum. The duties of the assistant chief factory inspector and the deputy factory inspectors shall be the same as those now or hereafter imposed by laws upon the Chief State Factory Inspector, the assistant chief factory inspector, and the deputy factory inspectors. Said Chief State Factory Inspector, assistant chief factory inspector and deputy factory inspectors shall visit and inspect at all reason-

able hours, as often as practicable, the factories, mercantile establishments, mills and workshops, and commercial institutions in this State, where goods, wares or merchandise are manufactured, stored, purchased or sold, at wholesale or retail. And the Chief State Factory Inspector shall report in writing to the Governor on the 15th day of December annually, the result of his inspections and investigations, together with such other information and recommendations as he may deem proper. And said inspectors shall make a special investigation into the conditions of labor in this State, or into any alleged abuses in connection therewith, whenever the Governor shall direct, and report the results of the same to the Governor. It shall be the duty of said inspectors to enforce the provisions of this Act, and perform such other duties as now are or shall hereafter be prescribed by law, and to prosecute all violations of law relating to the inspection of factories, mercantile establishments, mills, workshops and commercial institutions in this State before any magistrate or any court of competent jurisdiction in this State. And it shall be the duty of the state's attorney of the proper county, upon request of the Chief State Factory Inspector or his deputies, to prosecute any violation of law which it is made the duty of the factory inspectors to enforce. And it shall be the duty of the attorney for such department to prosecute, when required by the Chief State Factory Inspector, any infractions or violations of law which is now or may be hereafter made the duty of the factory inspectors to enforce. Said Chief State Factory Inspector shall, by written order, filed with the Governor, divide the State into inspection districts, due regard being had to the number of factories and the amount of work required to be performed in each district. And he shall assign to each district a deputy inspector, who shall have charge of the inspection in the district to which he is assigned, under the supervision of the Chief State Factory Inspector. The Chief State Factory Inspector may at any time, when in his discretion the good of the service requires, change a deputy inspector from one district to another, or reassign the districts of the State among the several deputy inspectors under his charge. He may at any time, when the conditions are changed or in his discretion the good of the service requires, by a like order filed with the Governor, redivide the State into inspection districts, changing the territory embraced within the several districts, as to him may seem advisable.

Sec. 3. Section nine (9) of an Act entitled, "An Act to regulate the manufacture of clothing, wearing apparel and other articles in this State, and to provide for the appointment of State inspectors to enforce the same, and to make an appropriation therefor," approved June 17, 1893, in force July 1, 1893, as amended by an Act approved May 15, 1903, in force July 1, 1903, being in conflict herewith, is hereby repealed.

Approved June 3, 1907, in effect July 1, 1907.

Present Child Labor Law of the State of Illinois passed in 1903 by the Forty-third General Assembly. Original draft of the bill was prepared and presented to the Assembly for consideration by the following committee:

- Edwin G. Cooley, Supt. of Schools of City of Chicago.
- E. P. Bicknell, General Supt. Chicago Bureau of Charities.
- Jane Addams, Head Resident, Hull House.
- Harriest M. Van der Vart, Industrial Committee, State Federation of Women's Clubs.
- Judge R. S. Tuttle, Juvenile Court, Cook County.
- George Thompson, Member of the Legislative Committee of the Federation of Labor.
- T. D. Hurley, President Visitation and Aid Society.
- W. L. Bodine, *ex officio* Supt. Compulsory Education.
- Edgar T. Davies, Chief State Factory Inspector, Chairman of the Committee.

The original draft of the bill was introduced in the Legislature by Representative Frederick L. Davies of the Third District and referred to the Committee on Labor and Industrial Affairs and amended and passed in its present form.

INSPECTION LAWS.

AN ACT to regulate the employment of children in the State of Illinois, and to provide for the enforcement thereof.

(Approved May 15, 1903. In force July 1, 1903.)

- Section 1. Child under 14 years.
- Section 2. Register required.
- Section 3. Wall list required.
- Section 4. Age and school certificate required.
- Section 5. Age and school—how issued.
- Section 6. Proof of age required.
- Section 7. Employment ticket issued by school authorities.
- Section 8. Schooling required.
- Section 9. Duties of State Inspector of Factories.
- Section 10. Hours of labor limited.
- Section 11. Employments forbidden children under 16 years of age.
- Section 12. Presence of a child in an establishment to be *prima facie* evidence of employment.
- Section 13. Enforcement of the provisions of this Act.
- Section 14. Penalty.
- Section 15. Repeal.

SECTION 1. CHILD UNDER FOURTEEN YEARS.] *Be it enacted by the People of the State of Illinois represented in the General Assembly:* That no child under the age of fourteen years shall be employed, permitted or suffered to work at any gainful occupation in any theatre, concert hall or place of amusement where intoxicating liquors are sold, or in any mercantile institution, store, office, hotel, laundry, manufacturing establishment, bowling alley, passenger or freight elevator, factory or workshop, or as messenger or driver therefor, within this State. That no child under fourteen years of age shall be employed at any work performed for wages or other compensation, to whomsoever payable, during any portion of any month when the public schools of the town, township, or village or city in which he or she resides are in session, nor be employed at any work before the hour of seven o'clock in the morning or after the hour of six o'clock in the evening: *Provided*, that no child shall be allowed to work more than eight hours in any one day.

§ 2. REGISTER.] It shall be the duty of every person, firm or corporation, agent or manager of any firm or corporation employing minors over fourteen years and under sixteen years of age in any mercantile institution, store, office, hotel, laundry, manufacturing establishment, bowling alley, theatre, concert hall or place of amusement, passenger or freight elevator, factory or workshop, or as messenger or driver therefor, within this State, to keep a register in said mercantile institution, store, office, hotel, laundry, manufacturing establishment, bowling alley, theatre, concert hall or place of amusement, factory or workshop in which said minors shall be employed or permitted or suffered to work, in which register shall be recorded the name, age and place of residence of every child employed or suffered or permitted to work therein, or as messenger or driver therefor, over the age of fourteen and under the age of sixteen years; and it shall be unlawful for any person, firm or corporation, agent or manager, of any firm or corporation to hire or employ, or to permit or suffer to work in any mercantile

institution, store, office, hotel, laundry, manufacturing establishment, bowling alley, theatre, concert hall or place of amusement, passenger or freight elevator, factory or workshop, or as messenger or driver therefor, any child under the age of 16 and over 14 years of age, unless there is first produced and placed on file in such mercantile institution, store, office, hotel, laundry, manufacturing establishment, bowling alley, factory or workshop, theatre, concert hall or place of amusement, an age and school certificate, approved as hereinafter provided.

§ 3. WALL LISTS.] Every person, firm or corporation, agent or manager of a corporation employing or permitting or suffering to work five or more children under the age of sixteen years and over the age of fourteen in any mercantile institution, store, office, laundry, hotel, manufacturing establishment, factory or workshop, shall post and keep posted in a conspicuous place in every room in which such help is employed, or permitted or suffered to work a list containing the name, age and place of residence of every person under the age of sixteen years employed, permitted or suffered to work in such room.

§ 4. AGE AND SCHOOL CERTIFICATE.] No child under sixteen years of age and over fourteen years of age shall be employed in any mercantile institution, store, office, hotel, laundry, manufacturing establishment, bowling alley, theatre, concert hall or place of amusement, passenger or freight elevator, factory or workshop, or as messenger or driver therefor, unless there is first produced and placed on file in such mercantile institution, store, office, hotel, laundry, manufacturing establishment, bowling alley, theatre, concert hall or place of amusement, factory or workshop, and accessible to the State Factory Inspector, assistant factory inspector or deputy factory inspector, an age and school certificate as hereinafter prescribed; and unless there is kept on file and produced on demand of said inspectors of factories a complete and correct list of all the minors under the age of sixteen years so employed who cannot read at sight and write legibly simple sentences, unless such child is attending night school as hereinafter provided.

§ 5. AGE AND SCHOOL CERTIFICATES—HOW APPROVED.] An age and school certificate shall be approved only by the superintendent of schools or by a person authorized by him in writing; or where there is no superintendent of schools, by a person authorized by the school board: *Provided*, That the superintendent or principal of a parochial school shall have the right to approve an age and school certificate and shall have the same rights and powers as the superintendent of public schools to administer the oaths herein provided for children attending parochial schools: *Provided, further*, That no member of a school board or other person authorized as aforesaid, shall have authority to approve such certificates for any child then in or about to enter his own establishment, or the employment of a firm or corporation of which he is a member, officer or employé. The person approving these certificates shall have authority to administer the oath provided herein, but no fee shall be charged therefor. It shall be the duty of the school board or local school authorities to designate a place (connected with their offices, when practicable) where certificates shall be issued and recorded, and to establish and maintain the necessary records and clerical service for carrying out the provisions of this Act.

§ 6. PROOF OF AGE.] An age and school certificate shall not be provided unless satisfactory evidence is furnished by the last school census, the certificate of birth or baptism of such child, the register of birth of such child with a town or city clerk, or by the records of the public or parochial schools, that such child is of the age stated in the certificate: *Provided*, That in cases arising wherein the above proof is not obtainable, the parent or guardian of the child shall make oath before the juvenile or county court as to the age of such child, and the court may issue to such child an age certificate as sworn to.

§ 7. EMPLOYMENT TICKET.] The age and school certificate of a child under sixteen years of age shall not be approved and signed until he presents

to the person authorized to approve and sign the same, a school attendance certificate, as hereinafter prescribed, duly filled out and signed. A duplicate of such age and school certificate shall be filled out and shall be forwarded to the State Factory Inspector's office. Any explanatory matter may be printed with such certificate in the discretion of the school board or superintendent of schools. The employment and the age and school certificates shall be separately printed and shall be filled out, signed and held or surrendered as indicated in the following forms:

SCHOOL CERTIFICATES.

(Name of school.) (City or town and date.)

This certifies (name of minor) of the ...th grade, can read and write legibly simple sentences.

This also certifies that according to the records of this school, and in my belief, the said (name of minor) was born at (name of city or town) in (name of county) on the (date) and is now (number of years and months) old.

(Name of parent or guardian.)

(Residence.)

(Signature of teacher).....grade.

Correct. (Name of principal.)

(Name of school.)

EVENING SCHOOL ATTENDANCE CERTIFICATE.

(Date.)

This certifies that (name of minor) is registered in and regularly attends the.....evening school.

This also certifies that according to the records of my school and in my belief the said (name of minor) was born at (name of city or town) on the....th day of (year), and is now (number of years and months) old.

(Signature of teacher.)

(Signature of principal.)

(Name of parent or guardian.)

(Residence.)

AGE AND SCHOOL CERTIFICATE.

This certifies that I am (father, mother, guardian or custodian) of (name of minor), and that (he or she) was born at (name of town or city) in the (name of county if known) and state or country of.....on the (day of birth and year of birth) and is now (number of years and months) old.

(Signature of parent, guardian or custodian.)

(City or town and date.)

There personally appeared before me the above named (name of person signing) and made oath that the foregoing certificate by (him or her) signed is true to the best of (his or her) knowledge. I hereby approve the foregoing certificate of (name of child), height (feet and inches), weight....., complexion (fair or dark), hair (color), having no sufficient reason to doubt that (he or she) is of the age therein certified.

Owner of certificate. This certificate belongs to (name of child in whose behalf it is drawn) and is to be surrendered to (him or her) whenever (he or she) leaves the service of the corporation or employer holding the same; but if not claimed by said child within thirty days from such time it shall be returned to the superintendent of schools, or where there is no superintendent of schools, to the school board.

(Signature of person authorized to approve and sign with official character authority.)

(Town or city and date.)

Illiteracy—In the case of a child who cannot read at sight and write legibly simple sentences, the certificate shall continue as follows, after the word sentences: "I hereby certify that (he or she) is regularly attending the (name of public or parochial evening school)." This certificate shall continue in force just as long as the regular attendance of said child at said evening school is certified weekly by the teacher and principal of said school.

Evening School—In any city or town in which there is no public or parochial evening school, an age and school certificate shall not be approved for a child under the age of sixteen years who can not read at sight and write legibly simple sentences. When the public or parochial evening schools are not in session an age and school certificate shall not be approved for any child who can not read at sight and write legibly simple sentences. The certificate of the principal of a public or parochial school shall be *prima facie* evidence as to the literacy or illiteracy of the child.

§ 8. **SCHOOLING REQUIRED.**] No person shall employ any minor over fourteen years of age and under sixteen years, and no parent, guardian or custodian shall permit to be employed any such minor under his control, who can not read at sight and write legibly simple sentences, while a public evening school is maintained in the town or city in which such minor resides, unless such minor is a regular attendant at such evening school.

§ 9. **DUTIES OF STATE INSPECTOR OF FACTORIES.**] The State Inspector of Factories, his assistants or deputies, shall visit all mercantile institutions, stores, offices, laundries, manufacturing establishments, bowling alleys, theatres, concert halls or places of amusement, factories or workshops, and all other places where minors are or may be employed, in this State, and ascertain whether any minors are employed contrary to the provisions of this Act. Inspectors of factories may require that age and school certificates, and all lists of minors employed in such factories, workshops, mercantile institutions, and all other places where minors are employed as provided for in this Act shall be produced for their inspection, on demand.

And, provided, further, that upon written complaint to the school board or local school authorities of any city, town, district or municipality, that any minor (whose name shall be given in such complaint) is employed in any mercantile institution, store, office, laundry, manufacturing establishment, bowling alley, theatre, concert hall or place of amusement, passenger or freight elevator, or factory, workshop, or as messenger or driver therefor, contrary to the provisions of this Act, it shall be the duty of such school board or local authority to report the same to the State Inspector of Factories.

§ 10. **HOURS OF LABOR.**] No person under the age of sixteen years shall be employed or suffered or permitted to work at any gainful occupation more than forty-eight hours in any one week, nor more than eight hours in any one day; or before the hour of seven o'clock in the morning or after the hour of seven o'clock in the evening. Every employer shall post in a conspicuous place in every room where such minors are employed a printed notice stating the hours required of them each day of the week, the hours of commencing and stopping work and the hours when the time or times allowed for dinner or for other meals begins and ends. The printed form of such notice shall be furnished by the State Inspector of Factories, and the employment of any such minor for longer time in any day so stated shall be deemed a violation of this section.

§ 11. **EMPLOYMENT FORBIDDEN CHILDREN UNDER SIXTEEN YEARS OF AGE.**] No child under the age of sixteen years shall be employed at sewing belts, or to assist in sewing belts, in any capacity whatever; nor shall any child adjust any belt to any machinery; they shall not oil or assist in oiling, wiping or cleaning machinery; they shall not operate or assist in operating circular or band saws, wood-shapers, wood-jointers, planers, sandpaper or wood-polishing machinery, emery or polishing wheels used for polishing metal, wood-turning or boring machinery, stamping machines in sheet metal and

tinware manufacturing, stamping machines in washer and nut factories, operating corrugating rolls, such as are used in roofing factories, nor shall they be employed in operating any passenger or freight elevators, steam boiler, steam machinery, or other steam generating apparatus, or as pin boys, in any bowling alleys; they shall not operate or assist in operating, dough brakes, or cracker machinery of any description; wire or iron straightening machinery; nor shall they operate or assist in operating rolling mill machinery, punches or shears, washing, grinding or mixing mill or calendar rolls in rubber manufacturing, nor shall they operate or assist in operating laundry machinery; nor shall children be employed in any capacity in preparing any composition in which dangerous or poisonous acids are used, and they shall not be employed in any capacity in the manufacture of paints, colors or white lead; nor shall they be employed in any capacity whatever in operating or assisting to operate any passenger or freight elevator; nor shall they be employed in any capacity whatever in the manufacture of goods for immoral purposes, or any other employment that may be considered dangerous to their lives or limbs, or where their health may be injured or morals depraved; nor in any theatre, concert hall, or place of amusement wherein intoxicating liquors are sold; nor shall females under sixteen years of age be employed in any capacity where such employment compels them to remain standing constantly.

§ 12. PRIMA FACIE EVIDENCE OF A CHILD'S EMPLOYMENT.] The presence of any person under the age of sixteen years in any manufacturing establishment, factory or workshop, shall constitute *prima facie* evidence of his or her employment therein.

§ 13. ENFORCEMENT OF THE PROVISIONS OF THIS ACT.] It shall be the special duty of the State Factory Inspector to enforce the provisions of this Act, and to prosecute all violations of the same before any magistrate or any court of competent jurisdiction in this State. It shall be the duty of the State Factory Inspector, Assistant State Factory Inspector and Deputy State Factory Inspectors under the supervision and direction of the State Factory Inspector, and they are hereby authorized and empowered to visit and inspect, at all reasonable times and as often as possible, all places covered by this Act.

§ 14. PENALTY.] Whosoever, having under his control a child under the age of sixteen years, permits such child to be employed in violation of the provisions of this Act, shall for each offense be fined not less than \$5.00 nor more than \$25.00, and shall stand committed until such fine and costs are paid.

A failure to produce to the inspector of factories, his assistants or deputies, any age and school certificates, or lists required by this Act shall constitute a violation of this Act, and the person failing shall, upon conviction, be fined not less than \$5.00 nor more than \$50.00 for each offense. Every person authorized to sign the certificate prescribed by section 7 of this Act, who certifies to any materially false statement therein shall be guilty of a violation of this Act, and upon conviction be fined not less than \$5.00 nor more than \$100.00 for each offense, and shall stand committed until such fine and costs are paid.

Any person, firm or corporation, agent or manager, superintendent or foreman of any firm or corporation—whether for himself or for such firm or corporation, or by himself or through sub-agents or foreman, superintendent or manager, who shall violate or fail to comply with any of the provisions of this Act, or shall refuse admittance to premises or otherwise obstruct the factory inspector, assistant factory inspector or deputy factory inspectors in the performance of their duties as prescribed by this Act, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined not less than \$5.00 nor more than \$100.00 for each offense, and shall stand committed until such fine and costs are paid.

§ 15. REPEAL.] "An Act to prevent Child Labor," approved June 17, 1891, in force July 1, 1891, and all other acts and parts of acts in conflict with this Act, are hereby repealed.

The law to provide for the safety and protection of persons engaged in the construction or alteration, removal or repairing of buildings, bridges and viaducts, which the writer drafted in 1907 and was passed by the Forty-fifth General Assembly, went into effect July, 1907, and the munificent results accomplished from its enforcement, showing the reduction of accidents and fatalities, is referred to in the earlier pages of this report.

AN ACT providing for the protection and safety of persons in and about the construction, repairing, alteration, or removal of buildings, bridges, viaducts, and other structures, and to provide for the enforcement thereof.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* That all scaffolds, hoists, cranes, stays, ladders, supports, or other mechanical contrivances, erected or constructed by any person, firm or corporation, in this State, for the use in the erection, repairing, alteration, removal or painting of any house, building, bridge, viaduct, or other structure, shall be erected and constructed in a safe, suitable and proper manner, and shall be so erected and constructed, placed and operated, as to give proper and adequate protection to the life and limb of any person or persons employed or engaged thereon, or passing under or by the same, and in such manner as to prevent the falling of any material that may be used or deposited thereon.

Scaffolding, or staging, swung or suspended from an overhead support, more than twenty (20) feet from the ground or floor, shall have where practicable a safety rail properly bolted, secured and braced, rising at least thirty-four (34) inches above the floor, or main portion of such scaffolding or staging, and extending along the entire length of the outside and ends thereof, and properly attached thereto, and such scaffolding or staging shall be so fastened as to prevent the same from swaying from the building or structure.

§ 2. If in any house, building or structure in process of erection or construction in this State (except a private house, used exclusively as a private residence), the distance between the enclosing walls is more than twenty-four (24) feet, in the clear, there shall be built, kept and maintained, proper intermediate supports for the joists, which supports shall be either brick walls, or iron or steel columns, beams, trussels [trusses] or girders, and the floors in all such houses, buildings or structures, in process of erection and construction, shall be designed and constructed in such manner as to be capable of bearing in all their parts, in addition to the weight of the floor construction, partitions and permanent fixtures, and mechanisms that may be set upon the same, a live load of fifty (50) pounds for every square foot of surface in such floors and it is hereby made the duty of the owner, lessee, builder or contractor or sub-contractor, of such house, building or structure, or the superintendent or agent of either, to see that all the provisions of this section are complied with.

§ 3. It shall be the duty of the owner of every house, building or structure (except a private house, used exclusively as a private residence) now under construction, or hereafter to be constructed, to affix and display conspicuously, on each floor of such building, during construction, a placard, stating the load per square foot [foot] of floor surface, which may, with safety, be applied to that particular floor, during such construction, or if the strength of different parts of any floor varies, then there shall be such placards for each varying part of such floor. It shall be unlawful to load any such floors or any part thereof, to a greater extent, than the load indicated on such placards, and all such placards shall be verified and approved by the State Factory Inspector, a deputy factory inspector, or by the local commissioner inspector of buildings or other proper authority, in the city, town or village charged with the enforcement of building laws.

§ 4. Whenever it shall come to the notice of the State Factory Inspector, or the local authority in any city, town or village in this State, charged with the duty of enforcing the building laws, that the scaffolding or the slings, hangers, blocks, pulleys, stays, braces, ladders, irons or ropes of any swinging or stationary scaffolding, platform or other similar device, used in the construction, alteration, repairing, removing, cleaning or painting of buildings, bridges or viaducts within this State are unsafe or liable to prove dangerous to the life or limb of any person, the State Factory Inspector, or such local authority or authorities, shall immediately cause an inspection to be made of such scaffolding, platform or device, or the slings, hangers, blocks, pulleys, stays, braces, ladders, iron or other parts connected therewith. If, after examination, such scaffolding platform or device or any of such parts, is found to be dangerous to the life or limb of any person, the State Factory Inspector, or such local authority shall at once notify the person responsible for its erection or maintenance, of such fact, and warn him against the use, maintenance or operation thereof and prohibit the use thereof, and require the same to be altered, and reconstructed so as to avoid such danger. Such notice may be served personally upon the person responsible for its erection or maintenance, or by conspicuously affixing it to the scaffolding, platform or other such device, or the part thereof declared to be unsafe. After such notice has been so served or affixed, the person responsible thereof shall cease using and immediately remove such scaffolding, platform or other device, or part thereof, and alter or strengthen it in such manner as to render it safe.

The State Factory Inspector, or any of his deputies, or such local authority, whose duty it is, under the terms of this Act, to examine or test any scaffolding, platform or other similar device, or part thereof, required to be erected and maintained by this section, shall have free access at all reasonable hours, to any building, or structure, or premises containing such scaffolding, platform, or other similar device, or parts thereof, or where they may be in use. All swinging and stationary scaffolding, platforms and other devices shall be so constructed as to bear four times the maximum weight required to be depended therein, or placed thereon, when in use, and such swinging scaffolding, platform or other device, shall not be so overloaded or overcrowded as to render the same unsafe or dangerous.

§ 5. That any person, firm or corporation in this State, hiring, employing or directing another to perform labor of any kind, in the erecting, repairing, altering or painting of any water pipe, stand pipe, tank, smoke stack, chimney, tower, steeple, pole, staff, dome or cupola, when the use of any scaffold, staging, swing, hammock support, temporary platform or other similar contrivance are required or used, in the performance of such labor, shall keep and maintain at all times, while such labor is being performed and such mechanical device is in use or operation, a safe and proper scaffold, stay, support or other suitable device, not less than sixteen (16) feet or more below such working scaffold, staging, swing, hammock, support or temporary platform, when such work is being performed, at a height of thirty-two (32) feet; [or more] for the purpose of preventing the person or persons performing such labor, from falling in case of any accident to such working scaffold, staging, swing, hammock, support or temporary platform.

§ 6. All contractors and owners, when constructing buildings in cities, where the plans and specifications require the floors to be arched between the beams thereof or where the floors of [or] filling in between the floors are fire-proof material or brick work, shall complete the flooring or filling in as the building progresses, to not less than within three tiers or beams below that on which the iron work is being erected. If the plans and specification of such buildings do not require filling in between the beams of floors with brick or fire-proof material, all contractors for carpenter work in course of construction shall lay the under flooring thereof or a safe temporary floor on each story as the building progresses to not less than within two stories or floors below the one to which such building has been erected. Where

double floors are not to be used, such owner or contractor shall keep planks over the floor two stories or floors below the story where the work is being performed. If the floor beams are of iron or steel the contractors for the iron or steel work of buildings in the course of construction or the owners of such buildings, shall thoroughly plank over the entire tier of iron or steel beams on which the structural iron or steel work is being erected, except such spaces as may be reasonably required for the proper construction of such iron or steel work and for the raising and lowering of materials, to be used in the construction of such buildings, or such spaces as may be designated by the plans and specifications for stairways and elevator shafts.

§ 7. If elevating machines or hoisting apparatus are used within a building in the course of construction, for the purpose of lifting material to be used in such construction, the contractors or owners shall cause the shafts or openings in each floor to be enclosed or fenced in on all sides by a substantial barrier or railing at least eight feet in height. Any hoisting machine or engine used in such building construction, shall where practicable, be set up or placed on the ground, and where it is necessary in the construction of such building to place such hoisting machine or engine on some floor above the ground floor, such machine or engine must be properly and securely supported with a foundation capable of safely sustaining twice the weight of such machine or engine. If a building in course of construction is five stories or more in height, no material needed for such construction shall be hoisted or lifted over public streets or alleys unless such street or alley shall be barricaded from use by the public. The chief officer in any city, town or village charged with the enforcement of local buildings laws, and the State Factory Inspector are hereby charged with enforcing the provisions of this Act: *Provided*, that in all cities in this State, where a local building commissioner is provided for by law, such officer shall be charged with the duty of enforcing the provisions of this Act, and in case of his failure, neglect or refusal so to do, the State Factory Inspector shall, pursuant to the terms of this Act, enforce the provisions thereof.

§ 7a. If elevating machines or hoisting apparatus, operated or controlled by other than hand power, are used in the construction, alteration or removal of any building or other structure, a complete and adequate system of communication by means of signals shall be provided and maintained by the owner, contractor, or sub-contractor, during the use and operation of such elevating machines or hoisting apparatus, in order that prompt and effective communication may be had at all times between the operator of engine or motive power of such elevating machines and hoisting apparatus, and the employes or persons engaged thereon, or in using or operating the same.

§ 8. It shall be the duty of all architects or draftsmen engaged in preparing plans, specifications or drawings to be used in the erection, repairing, altering or removing of any building or structure within the terms and provisions of this Act to provide in all such plans, specifications and drawings for all the permanent structural features or requirements specified in this Act; and any failure on the part of any such architects or draftsmen to perform such duty, shall subject such architects or draftsmen to a fine of not less than twenty-five dollars (\$25.00) nor more than two hundred dollars (\$200.00) for each offense.

§ 9. Any owner, contractor, sub-contractor, foreman or other person, having charge of the erection, construction, repairing, alteration, removal, or painting of any building, bridge, viaduct or other structure within the provisions of this Act, shall comply with all the terms thereof and any such owner, contractor, sub-contractor, foreman or other person, violating any of the provisions of this Act, shall upon conviction thereof, be fined not less than twenty-five dollars (\$25.00), nor more than five hundred dollars (\$500.00) or imprisoned for not less than three (3) months nor more than two (2) years, or both fined and imprisoned in the discretion of the court.

And in case of any such failure to comply with any of the provisions of this Act, any State Factory Inspector may, through the state's attorney, or any other attorney in case of his failure to act promptly, take the necessary legal steps to enforce compliance therewith.

If it becomes necessary, through the refusal or failure of the state's attorney to act, for any other attorney to appear for the State in any suit involving the enforcement of any provisions of this Act, reasonable fees for the services of such attorney shall be allowed by the board of supervisors or county commissioners in and for the county in which such proceedings are instituted.

For any injury to person or property, occasioned by any willful violations of this Act, or willful failure to comply with any of its provisions, a right of action shall accrue to the party injured, for any direct damages sustained thereby; and in case of loss of life by reason of such willful violation or willful failure as aforesaid, a right of action shall accrue to the widow of the person so killed, his lineal heirs or adopted children, or to any other person or persons who were, before such loss of life, dependent for support on the person or persons so killed, for a like recovery of damages for the injuries sustained by reason of such loss of life or lives.

APPROVED June 3, 1907. In force July 1, 1907.

The law to regulate the manufacture of garments and wearing apparel, sometimes called the "sweatshop law." This law is very inadequate, obsolete and almost useless. A more comprehensive bill to handle the intricate problems connected with the sweatshop bill as drafted by me (see annual report, this department, 1907), endorsed by the Forty-fifth General Assembly but failed of passage, but it is to be hoped that ere long the Legislature will give the tenement and sweatshop problem the proper attention and pass adequate legislation to govern the same.

An Act to regulate the manufacture of clothing, wearing apparel and other articles in this State, and to provide for the appointment of State Inspector to enforce the same and to make an appropriation therefor.

SECTION 1. *Be it enacted by the People of the State of Illinois represented in the General Assembly:* That no room or rooms, apartment or apartments in any tenement or dwelling house, used for eating or sleeping purposes, shall be used for the manufacture, for sale in whole or in part, of coats, vests, trousers, knee pants, overalls, cloaks, shirts, ladies' waists, purses, feathers, artificial flowers or cigars except by the immediate members of the family living therein. Every such workshop shall be kept in a cleanly state, and shall be subject to the provisions of this Act; and each of said articles made, altered, repaired or finished in any of such workshops shall be subject to examinations and inspection, as hereinafter provided, for the purpose of ascertaining whether said articles, or any of them, or any part thereof, are in a cleanly condition and free from vermin and any matter of an infectious and contagious nature and every person so occupying or having control of any workshop as aforesaid shall within fourteen days from the taking effect of this Act, or from the time of beginning of work in any workshop as aforesaid, notify the board of health of the location of such workshop, the nature of the work there carried on, and the number of persons therein employed.

§ 2. If the board of health of any city or said State Inspector finds evidence of infection or contagious diseases present in any workshop, or in goods manufactured or in process of manufacture therein, and if said board or inspector shall issue such order or orders as the public health may require, and the board of health are hereby enjoined to condemn and destroy all such infectious and contagious articles.

§ 3. Whenever it shall be reported to said inspector or to the board of health, or either of them, that coats, vests, trousers, knee-pants, overalls, cloaks, shirts, ladies' waists, purses, feathers, artificial flowers or cigars are

being transported to this State, having been previously manufactured in whole or part under unhealthy conditions, said inspector shall examine said goods and the condition of their manufacture, and if upon such examination said goods or any of them are found to contain vermin, or to have been made in improper places or under unhealthy conditions, he shall make report thereof to the board of health, or inspector, which board or inspector shall thereupon make such order or orders as the public health shall require, and the board of health are hereby empowered to condemn or destroy all such articles.

§ 5. The word "manufacturing establishment," "factory" or "workshop" wherever used in this Act, shall be construed to mean any place where goods or products are manufactured or repaired, cleaned or sorted, in whole or in part, for sale, or for wages. Whenever any house, room or place is used for the purpose of carrying on any process of making, altering, repairing or finishing for sale, or for wages, any coats, vests, trousers, knee-pants, overalls, cloaks, shirts, ladies' waists, purses, feathers, artificial flowers or cigars or any wearing apparel of any kind whatsoever, intended for sale, it shall, within the meaning of this Act, be deemed a workshop for the purposes of inspection. And it shall be the duty of every person, firm or corporation to keep a complete list of all such workshops in his, their or its employ, and such list shall be produced for inspection on demand by the board of health or any of the officers thereof, or by the State Inspector, assistant inspector, or any of the deputies appointed under this Act.

§ 6. Any person, firm or corporation who fails to comply with any provision of this Act shall be deemed guilty of a misdemeanor, and on conviction thereof shall be fined not less than \$3.00 nor more than \$100.00 for each offense.

The law to protect employes engaged in the metal polishing and grinding business from the evil effects of dusts, etc.

AN ACT to compel the using of blowers upon metal polishing machinery.

SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly:* That all persons, companies or corporations operating any factory or workshop where emery wheels or emery belts of any description are used, either solid emery, leather, leather covered, felt, canvas, linen, paper, cotton, or wheels or belts rolled or coated with emery or corundum or cotton wheels used as buffs, shall provide the same with blowers, or similar apparatus, which shall be placed over, beside or under such wheels or belts in such a manner as to protect the person or persons using the same from the particles of dust produced and caused thereby, and to carry away the dust arising from or thrown off by such wheels or belts while in operation directly to the outside of the building or to some receptacle placed so as to receive and confine such dust: *Provided*, that grinding machines upon which water is used at the point of the grinding contact shall be exempt from the provisions of this Act, and provided, this Act shall not apply to small shops employing not more than one man in such work.

§ 2. It shall be the duty of any person, company or corporation operating any such factory or workshop to provide or construct such appliances, apparatus, machinery or other things necessary to carry out the purpose of this Act, as set forth in the preceding section, as follows: Each and every such wheel shall be fitted with a sheet of case iron or hood or hopper of such form and so applied to such wheel or wheels that the dust or refuse therefrom will fall from such wheels or will be thrown into such hood or hopper by centrifugal force and be carried off by the current of air into a suction pipe attached to same hood or hopper.

§ 3. Each and every such wheel six inches or less in diameter shall be provided with a three-inch suction pipe; wheels six inches to twenty-four inches in diameter with four-inch (such) suction pipe; wheels from twenty-four inches to thirty-six inches in diameter with five-inch suction pipe; and

all wheels larger in diameter than those stated above shall be provided each with a suction pipe not less than six inches in diameter. The suction pipe from each wheel, so specified, must be full size to the main trunk suction pipe and the main suction pipe to which smaller pipes are attached shall, in its diameter and capacity, be equal to the combined area of such smaller pipes attached by the same, and the discharge pipe from the exhaust fan, connected with such suction pipe or pipes, shall be as large or larger than the suction pipe.

§ 4. It shall be the duty of any person, company or corporation operating any such factory or workshop to provide the necessary fans or blowers to be connected with such pipe or pipes, as above set forth, which shall be run at a rate of speed as will produce a velocity of air in such suction or discharge pipes of at least nine thousand feet per minute to an equivalent suction or pressure of air equal to raising a column of water not less than five inches in a U-shaped tube. All branch pipes must enter the main trunk pipe at an angle of forty-five degrees or less, the main suction or trunk pipe shall be below the emery or buffing wheels and as close to the same as possible, and to be either upon the floor or beneath the floor on which the machines are placed to which such wheels are attached. All bends, turns or elbows in such pipes must be made with easy, smooth surfaces, having a radius in the throat of not less than two diameters of the pipe on which they are connected.

§ 5. It shall be the duty of any factory inspector, sheriff, constable or prosecuting attorney of any county in this State, in which any such factory or workshop is situated, upon receiving notice in writing signed by any person having knowledge of such facts, accompanied by the sum of one dollar as compensation for his services, that such factory or workshop is not provided with such appliances as herein provided for to visit any such factory or workshop and inspect the same, and for such purpose they are hereby authorized to enter any factory or workshop in this State during working hours, and upon ascertaining the facts that the proprietors or managers of such factory or workshop have failed to comply with the provisions of this Act, to make complaint of the same in writing before a justice of the peace or police magistrate having jurisdiction, who shall thereupon issue his warrant, directed to the owner, manager or director in such factory or workshop, who shall be thereupon proceeded against for the violation of this Act as hereinafter mentioned and it is made the duty of the prosecuting attorney to prosecute all cases under this Act.

§ 6. Any such person or persons or company, or managers, or directors of any such company or corporation who shall have the charge or management of such factory or workshop, who shall fail to comply with the provisions of this Act, shall be deemed guilty of a misdemeanor, and, upon conviction thereof before any court of competent jurisdiction, shall be punished by a fine of not less than \$25.00 and not exceeding \$100.00.
